

March 30, 2015

To Our Valued Customers:

Presby Environmental, Inc. (PEI) and Advanced Drainage Systems, Inc. (ADS) are exploring opportunities for our companies to leverage each other's strengths and have entered into an agreement pursuant to which ADS will be discontinuing its GEO-flow product line. We encourage ADS' customers using the GEO-flow product to contact Presby Environmental using the contact information below to help ensure a smooth transition for ADS' GEO-flow customers.

Over the past twenty years, PEI has become an industry leader in innovative decentralized wastewater treatment and dispersal systems, focusing on technical excellence and customer support.

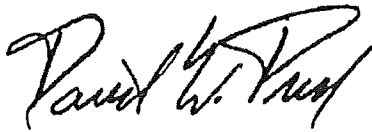

If you have questions about existing GEO-flow systems, please contact ADS using the information below. We are excited about this opportunity and look forward to making this a smooth transition over the next few months.
